

# Marine Construction Works/Land Reclamation/Beach Replenishment in the Territorial Sea and Controlled Waters Adjacent to Northern Ireland

## Marine Licensing

**Important:** before completing this form, please read these notes carefully.

The following numbered paragraphs correspond to the questions on the application form and are intended to assist applicants in completing the form. These explanatory notes are specific to this application and so applicants are advised to read these in conjunction with the General Marine Licensing Guidance document. However it may be that these notes do not fully cover all the questions that you may have. If further clarification is needed please telephone us on

028 90569247 or email

[MarineLicensingTeam@daera-ni.gov.uk](mailto:MarineLicensingTeam@daera-ni.gov.uk)

For fees categories please see Marine Licensing Fees Addendum

For further Guidance please refer to Marine Licensing Guidance for Applicants

## EXPLANATORY NOTES

### 1. Project Title

Enter the name of the project.

Indicate the location of the construction project using Latitude and Longitude co-ordinates in degrees and minutes to one decimal point of a minute provided. Any distances at sea should be in nautical miles, and on land should be in miles unless otherwise stated.

#### Attachments required.

You must provide appropriate drawing of the proposals including a red line diagram of the proposed construction location on an admiralty chart.

### 2. Applicant

The person, company or organisation making the application. (The licensee(s) may be any of the following, the contractor actually carrying out the construction work, the applicant and possibly other bodies involved).

### 3. Agent

Any person, company or organisation acting on behalf of the applicant. They may be acting under contract (or other agreement) on behalf of any party listed in the answer to question 2, and have responsibility for the control; management or physical deposit of materials anywhere below the tidal limit of the mean high water springs (MHWS). (e.g. A consultancy company submitting the application or a contractor who will be carrying out the works.)

### 4. Duration of project

Details of the proposed commencement and completion dates of the works.

A licence is normally valid for 1 calendar year or the duration of the works (whichever is longer) but not normally exceeding 3 years. After this period, it will be necessary for licence holders to re-apply for a further licence to continue any ongoing works. It is the licensee's responsibility to apply for any further licences or an extension prior to the expiry of the initial licence.

### 5. Description and Cost of the Proposed Project

- (a) This estimate should cover only works taking place below the tidal level of Mean High Water Springs (MHWS) and should take into consideration the cost of materials, labour, fees etc.
- (b) Where the project is expected to take longer than 1 calendar year, this description must detail which elements of work are to be undertaken in the first 12 months, with an outline of the schedule for each further 12 month period of work. (The method of work etc. should be described in the answer to question 7.)
- (c) Select the options which most appropriately describe the type of work proposed. Where the project involves a number of elements, please tick each relevant box.

## 6. Location of Works

Include a list of the latitude and longitude co-ordinates of the boundary points of the proposed project. In a few cases, (e.g. laying of long pipelines) it may only be practicable to supply co-ordinates for the start and end points.

Latitude and Longitude: For positions read from charts of 1:25,000 scale or smaller, the format should be e.g. **55° 55'.5N 2° 22'.2W**. The decimal point specifies that decimals of minutes are used and the datum is stated explicitly.

**It is important that the correct positions are included with this application, as any errors may result in the application being refused or delayed.**

To supplement the information given in section 6, Department of Agriculture, Environment and Rural Affairs (DAERA) Marine and Fisheries Division requires the following to be provided with the completed application form:

- A suitably scaled extract from an Admiralty Chart which should be marked to indicate
  - The full extent of the works in relation to the surrounding area;
  - Latitude and longitude co-ordinates defining the area of operation;
  - The level of Mean High Water Springs (MHWS)
  - Any adjacent Special Area of Conservation (SAC), Area of Special Scientific Interest (ASSI), Special Protection Area (SPA)/RAMSAR or similar conservation area boundary.

DAERA Marine and Fisheries Division require electronic copies of all documents to be provided. Normally only **one** copy will be required, however if the documents are too large to send electronically then ancillary copies on CD or other electronic storage devices will be required for consultation purposes, DAERA Marine and Fisheries Division will advise the applicant accordingly.

If they are subject to copyright, **it is the responsibility of the applicant to obtain necessary approvals to reproduce the documents and to submit suitably annotated copies with the application.** Alternatively maps/drawings can be sent electronically by email.

- **Sewer outfalls, discharge pipes for storm overflow and industrial waste etc.** The size and description of the pipe should be shown on the longitudinal sections and also details of any supports, foundations, methods of jointing and details of any tidal flaps.
- **Bridges over tidal waters:** an elevation with longitudinal and cross-sections of the bridge to a suitable scale should show the dimensions of the spans and width of piers, etc. above and below MHWS and the maximum and minimum heights of the undersides of the superstructures above MHWS. The headroom above MHWS and the width of span of the nearest bridges, if any, above and below the site should be stated.
- **Tunnels under tidal waters:** the longitudinal section of the tunnel should show the distances between the bed of the river or estuary and the top of the tunnel. Cross-sections should show the internal and external dimensions of the tunnel and particulars of construction. When a proposed future dredging level is known this must also be shown on all sections.
- **Overhead cables:** catenaries must be supplied in addition to the site plan showing the minimum clearance of the cable at MHWS and the electrical clearance allowed.
- **Marine Aquaculture:** proposals for fish farming and shellfish growing are subject to different procedures (refer to The Marine Licensing (Exempted Activities) Order (Northern Ireland) 2011).

The applicant should note that if the drawings/plans are subject to copyright, **it is the responsibility of the applicant to obtain the necessary approvals to reproduce the documents and to submit suitably annotated copies with the application.**

## 7. Method Statement

Please provide a full method statement, including details of any temporary structures that may be required below MHWS during the works, and the ultimate fate of the structure and material used in its construction. Details of these structures will be included in any licence that may be issued.

Proposed measures to ensure the marine environment is adequately safeguarded during the work should also be described (e.g. the method to be adopted to ensure that the loss of fine grained material is minimised during construction), as should those taken to minimise any interference with other uses of the sea or foreshore.

## **8. Permanent Deposits**

- (a) Tick the appropriate box (es) to indicate all materials to be deposited below MHWS. If you propose using types of materials for which a specific box is not provided, please describe the nature of such material in the box marked "other".
- (b) If any of the materials to be placed below MHWS are to be brought to the site by sea, give details of the material, e.g. clean rock, and average particle size. Also indicate the vessels to be used, a chart showing the proposed vessel route to the site of the works and details of any trans-shipment areas i.e. where material may be off-loaded to smaller vessels or barges for transport inshore to the site of the works.
- (c) Where the proposed works involve beach replenishment or land reclamation, additional information is required about the material to be deposited and method of delivery. The description of material must include details of its chemical quality. Where the material has not been chemically analysed, DAERA Marine and Fisheries Division may request representative samples for analysis or require the applicant to arrange for analyses to be undertaken before the licence can be determined.

## **9. Temporary Deposits**

If temporary deposits are required, please provide details as with the permanent deposits above. The temporary deposit location details (Latitude/Longitude) should be added to section 6 of the form, and the period of time the site will be used must be provided. If issuing a licence, DAERA Marine and Fisheries Division will include on the document details of any area that has been approved as a temporary deposit site.

## **10. Dredging**

Indicate whether you are proposing to dredge as part of the works. A separate Marine Licence may be required. The granting of the construction licence does not imply that the dredging licence will also be granted, as different assessment criteria are used to determine each type of application.

## **11. Disposal of material at sea**

Indicate whether you are proposing to dispose of any excess material arising from the construction work at sea. A separate Marine Licence may be required. The granting of the construction licence does not imply that the sea licence will also be granted, as different assessment criteria are used to determine each type of application.

## **12. Planning**

If the application is subject to planning permission, please give relevant details, including planning reference number, if planning has been approved/rejected and attached a copy of the environmental statement if appropriate.

## **13. Statutory Consenting Powers**

Please describe what (if any) statutory responsibilities you (or your client) have to consent any aspect of the project.

## **14. Consultation**

- (a) Have the public been invited to comment on these proposals? if so to whom and what was the closing date
- (b) Have any consultation meetings been held with the public/other bodies? If so where and when?

## **15. Consultation with Conservation Bodies**

Consenting authorities have a duty to ensure that any works will not have a significant adverse environmental impact, particularly upon designated conservation areas (e.g. ASSIs/SAC, SPA/RAMSAR sites etc) listed under The Conservation (Natural Habitats, etc.) (Amendment) Regulations (Northern Ireland) 2007. If the applicant (particularly if they have statutory powers for consenting aspects of these works) has already been in consultation with the appropriate nature conservation body – NIEA, Natural Environment Division, please supply any response that they may have given.

Any application for beach replenishment works should be cross checked as to whether the proposed site is a designated bathing water site and if so, ideally all physical works should be done out with the Bathing Water Season (1<sup>st</sup> June to 15<sup>th</sup> September). Further guidance on the Bathing waters Directive (76/160/EEC) can be obtained from <http://www.ni-environment.gov.uk/water-home/quality/bathingqualityni.htm>

In addition, guidance can be obtained from [www.foodstandards.gov.uk/](http://www.foodstandards.gov.uk/) with regards to the Shellfish Waters Directive (2006/113/EC) which has parameters set to protect the water quality in which edible shellfish are grown.

## **16. Designated Conservation Areas**

Indicate whether the proposed works are located within or close to the boundaries of a conservation area such as an ASSI, MCZ, SAC, SPA or Ramsar Site.

## **17. Environmental Assessment**

Please indicate whether any environmental assessments have been carried out in respect of the proposed works, either under your own powers or as required by another authority. If such an assessment has been undertaken, please indicate if a copy has been provided with your application. If the statement/assessment has been completed but is not available, please provide an explanation in the space provided.

Additionally please also give details if and where a copy has been/ is being made available for public inspection.

Please ensure that you have:

- Completed **all** appropriate sections of the application form
- Signed and dated the declaration
- Provided the relevant documentation, charts and continuation sheets and
- Enclosed the correct payment (refer to fees addendum) or paid by means of BACS (if appropriate)

**Otherwise your application will be delayed or returned to you  
Marine and Coastal Access Act 2009 (Part 4 Marine Licensing)**

**Application for Marine Construction Works/Land Reclamation/Beach  
Replenishment in the Territorial Sea and UK Controlled Waters Adjacent to  
Northern Ireland**

(Construction schemes including coast defences, beneficial uses of dredged materials, jetties, land reclamation, outfall pipes etc.)

**It is the responsibility of the applicant to obtain any other consents or  
authorisations that may be required**

**Under Part 4 (Chapter 5) of the Marine and Coastal Access Act 2009, information contained within or provided in support of this application will be placed on the public register unless DAERA Marine and Fisheries Division (as the licensing authority) approves the applicant's reasons for withholding all or part thereof.**

**Public Register**

Is there any information contained within or provided in support of this application that you consider should not be included on the Public Register on the grounds that its disclosure:

- a) would be contrary to the interests of national security YES  NO
- b) would prejudice to an unreasonable degree your or some other person's commercial interests or those of a third party? YES  NO

If **YES**, to either (a) or (b), please provide full justification as to why all or part of the information you have provided should be withheld.

1.

Please give a brief identifiable description, including the location of the works.

Remediation of two existing pontoon piles to restore their structural integrity and prolong their service life. The remediation works include careful underwater preparation of each pile, the installation of custom-fabricated steel jackets to encapsulate corroded sections, and the use of high-strength flowable grout to reinstate continuity and strength. Additional protection against future corrosion will be provided by fitting new sacrificial anodes to each pile. Once existing piles have been repaired, a new floating pontoon will be put into place.  
Latitude: 54.482551082329145 Longitude: -5.648232319935421

## 2. Applicant Details

Title       Initials       Surname

Address:

Whiterock Bay  
Killinchy  
BT23 6QA

Name of contact:  
(if different from above)

Telephone number:  
(inc. code)

Email address:

### 3. Agent Details (if appropriate)

Title

Initials

Surname

Trading Title  
(if different from above)

Business Address:

Name of contact:  
(if different from above)

Position within company  
(if appropriate)

Telephone number:  
(inc. code)

Email address:

Company Registration No.

**4. Duration of Project**

Expected Start Date

25th Oct 25

Expected Completion Date

7th Nov 25

**5. Description and Cost of the Proposed Project**

(a) Estimated gross cost of the works proposed seawards of the tidal limit of the High Water Mean Spring Tide Mark

£40,000 GBP

(b) Give a detailed description of the proposed schedule of work

The proposed works at Strangford Lough Yacht Club focus on the remediation of two pontoon piles that currently show structural deterioration, including gaps in the existing steel collars, corrosion-induced section loss, and misalignment due to weakened connections. The project will begin with establishing secure site boundaries and mobilising marine equipment, plant, and welfare facilities, followed by the delivery of necessary materials such as new steel collars, grout, and sacrificial anodes. Pile preparation will involve using airlifting equipment to excavate bed material and expose the bases and collars, followed by thorough jet-cleaning to remove marine growth and debris. Oversized steel collars will then be positioned and welded around the existing collars, with non-shrink grout injected to restore the piles' structural integrity. Leaning piles will be realigned to vertical using a barge mounted crane before grouting. To prevent further corrosion, brackets and sacrificial anodes will be installed. The original pontoon has reached the end of its useful life and will be removed for deconstruction/construction waste recycling and a new pontoon floated into position.

If necessary please continue on a separate sheet and tick this box

### **Types of Work Proposed**

**Coastal/Flood defences:**

- beach replenishment
- shoreline reinforcement
- flood defence
- sea defence

**Slipways:**

- slipway
- causeway
- launching ramp

**Miscellaneous:**

- habitat creation/replacement
- aquaculture (unless exempted)
- sea wall
- berms/wave screens
- artificial reef

	sea-lock
<b>Harbour works:</b>	dock wall/quay/wharf
<b>Navigation works:</b>	lock gates
	moorings (unless exempted)
	buoy/navigation mark (unless exempted)
	training wall/breakwater
<b>Land reclamation:</b>	bunded/piled area
	dock infill
<b>Intakes/outfall pipes:</b>	intake/outfall
<b>Cables:</b>	cable/subsea cable
<b>Pipeline maintenance:</b>	pipe/pipeline maintenance
<b>Piers etc.:</b>	bridge supports/bridge foundation
	pier
	jetty
<b>Bank stabilisation:</b>	
<b>Scour protection:</b>	gabion
	mattressing
<b>Barrages &amp; island etc.</b>	tidal barrier
	barrage
	sculpture, statues, fountains etc.
	ground investigation works
	impoundment
<b>Sediment manipulation</b>	groynes

## 6. Location of Works

This should include Latitude and Longitude co-ordinates, to 1 decimal minute, defining the extent of the project.

The proposed works are located within the Whiterock Bay, Killinchy on the coast of Strangford Lough. Refer to DWG M0778-RPS-00-XX-DR-C-1003 for Location Plan. The 4 nr. points of the site boundary are listed below A. 54°28'.96N 5°38'.87W B. 54°28'.97N 5°38'.79W C. 54°28'.94N 5°38'.86W D. 54°28'.96N 5°38'.78W

If necessary, please continue on a separate sheet and tick this box

### 7. Method Statement

The proposed works aim to restore the stability and integrity of the existing pontoon piles and replace the pontoon with a newly fabricated unit. Due to cost and scheduling constraints, repairing the current piles rather than fully replacing them is the most practical solution. The works will begin with mobilisation of a barge equipped with a Hiab crane, which will serve as the main working platform for the duration of the project. The existing pontoon will be secured, detached, floated to shore, lifted out, inspected for invasive species, and decommissioned according to waste and biosecurity regulations. To protect the marine environment, silt curtains will be installed before any underwater work commences. Divers will excavate and clean the pile bases, remove old brackets while retaining collars, and prepare both internal and external surfaces for the installation of new steel jackets. Once fitted, these jackets will be grouted with high-strength marine-grade grout to ensure stability and prevent environmental contamination. Two zinc sacrificial anodes will be welded to each pile for long-term corrosion protection. After all underwater works are complete and debris is cleared, the new pontoon will be floated into place and securely attached. The site will then be fully demobilised.

If necessary, please continue on a separate sheet and tick this box

### 8. Permanent Deposits

(a) quantity of permanent materials to be deposited below HMWS tidemark:

- Timber (m<sup>2</sup> or tonnes) .....
- Iron/Steel (tonnes) ..... 800kg Steel .....
- Plastic/Synthetic (m<sup>2</sup>) .....
- Silt (m<sup>3</sup>) .....
- Sand (m<sup>3</sup>) .....
- Concrete (m<sup>3</sup>) ..... 200kg (Marine Grade Grout) .....
- Concrete bags/mattresses  
(Confirm number, dimensions  
& total volume m<sup>3</sup>) .....

Stone/Rock/Gravel  
(size range and volume m<sup>3</sup>)

None  
.....

If 'other' please describe below

If necessary, please continue on a separate sheet and tick this box

(b) for work involving salt marsh feeding, beach replenishment or land reclamation please provide the following information relating to the material to be deposited:

Quantity (tonnes) .....

Nature of Material  
(e.g. sand, silt, gravel etc.) .....

Source:  
(if sea dredged please state location of origin) .....

Particle Size .....

Has the material been chemically analysed? Yes  No

If Yes, please include the analysis data with your application.

### 9. Temporary Deposits

Will there be a need to make any temporary deposits of material below HMWS tidemark during the works

Yes  No

(a) quantity of temporary materials to be deposited below HMWS tidemark:

Timber (m<sup>2</sup> or tonnes) .....

Iron/Steel (tonnes) .....

Plastic/Synthetic (m<sup>2</sup>) .....

Silt (m<sup>3</sup>) .....

Sand (m<sup>3</sup>) .....

Concrete (m<sup>3</sup>) .....

Concrete bags/mattresses  
(Confirm number, dimensions  
& total volume m<sup>3</sup>) .....

Stone/Rock/Gravel  
(size range and volume m<sup>3</sup>) .....

If 'other' please describe below

If necessary, please continue on a separate sheet and tick this box

**10. Dredging**

Do you intend to apply for a licence to dredge as part of the works?

Yes  No

If Yes, please indicate the location .....  
of the dredging and nature of material .....

**11. Disposal of Material at Sea**

Do you intend to apply for a licence to dispose at sea material dredged as part of the works?

Yes  No

If Yes, please indicate:  
Nature and quantity of material .....  
(sand, gravel, silt, clay, rock etc.) .....

**12. Planning**

Is this project subject to a planning application?

Yes  No

If Yes, attach a copy of environmental statement (if appropriate) and indicate what stage the application for planning permission is at (i.e. approved, awaiting notification, rejected)

.....

### 13. Statutory Consenting Powers

Do you, or (if appropriate) your client, have statutory powers to consent any aspect of this project?

Yes  No

If Yes, please give details

### 14. Consultation

(a) Have the public been invited to submit comments? YES  NO   
If YES, how and where?

(b) Have any consultation meetings been held? YES  NO   
(with the public or other bodies)

*If necessary please continue on a separate sheet and tick this box*

### 15. Consultation with Conservation Bodies

Please provide details of any consultation that has taken place with NIEA Natural Environment Division and, if appropriate, include copies of any correspondence with your application.

*If necessary please continue on a separate sheet and tick this box*

### 16. Designated Conservation Areas

Are any parts of the proposed work located within the boundaries of a designated conservation area? **YES**  **NO**

If **No**, please indicate approximate distance of the disposal operation from the nearest designated conservation area.

kms

### 17. Environmental Assessment

Has an environmental assessment been undertaken to support any application in respect of the works, your own statutory powers (if applicable) or any other reason?

**YES**

**NO**

If **YES**, is a copy of the assessment included with this application?

**YES**

**NO**

If the assessment has been undertaken but has not been included with the application, please provide an explanation below.

Is the environmental assessment available for public inspection?

**YES**

**NO**

If YES at what locations:

Strangford Lough Yacht Club

## Declaration

I declare that the information given in this form and related papers is to the best of my knowledge and belief true.

**WARNING**  
**It is an offence under the Act under which this application is made to fail to disclose information or to provide false or misleading information.**

Signature of applicant:  
(or agent acting on behalf of applicant)

Date:

22/06/2025

Name (Block Letters):

Position within company:  
(if applicable)

**PLEASE CHECK CAREFULLY THE INFORMATION YOU HAVE GIVEN AND THAT ALL ENCLOSURES (INCLUDING COPIES) HAVE BEEN INCLUDED**

### Application Checklist

- **Completed application form**
- **Project drawings**
- **Method statement**
- **Maps/charts**
- **Additional environmental information e.g. photographs, environmental impact assessment etc.**
- **Payment**

***The Department takes data protection, freedom of information and environmental information issues seriously. It takes care to ensure that any personal information received from you is dealt with in a way which complies with the requirements of the UK General Data Protection Regulation. This means that any personal information you supply will be processed principally for the purpose for which it has been provided. However, the Department is under a duty to protect the public funds it administers, and to this end may use the information you have provided for this purpose.***

**A full copy of the DAERA Privacy Statement can be found here:-  
<https://www.daera-ni.gov.uk/daera-privacy-statement>**
