Dear [REDACTED]

OWENKILLEW RIVER AREA OF SPECIAL SCIENTIFIC INTEREST (ASSI) SITE MONITORING

The annual process of ASSI monitoring is now underway. Monitoring is a vital part of the work of Northern Ireland Environment Agency (NIEA). We need to visit ASSIs on a regular basis to check that the plants, animals or earth science features that made them so important in the first place are still present and thriving.

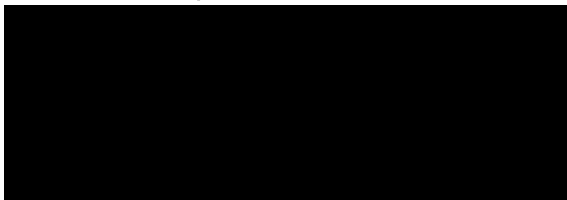

In April 2002, we began a major programme of quality monitoring. The aim is to visit each ASSI at least once every six years to check on its "health". A monitoring visit of this rolling programme is now due.

This process involves NIEA staff (or occasionally other scientists employed by NIEA), looking at how well the plants, animals or earth science features are doing. We will then be able to tell whether the site is changing, and if this change is for the better or worse. If it is felt that there is potential for changes in the management of the land, we can arrange for a member of staff to contact you to discuss appropriate changes.

The above exercise is scheduled to take place during May 2021 and we will be accessing the site at this time. If you have any problems or queries regarding this work, please do not hesitate to contact me via email: CDP@daera-ni.gov.uk or telephone: [REDACTED]

In light of the Covid 19 pandemic I can assure you that all Government issued guidelines will be followed and Personal Protective Equipment will be utilised, namely: regular washing of hands, use of sanitiser gels, and the use of gloves whilst undertaking duties at the site. It is not necessary for staff to meet up with you when we are on site.

Yours sincerely

If it is felt that there is potential for changes in the management of the land, we can arrange for a member of staff to contact you to discuss appropriate changes.

The above exercise is scheduled to take place during May 2021 and we will be accessing the site at this time. If you have any problems or queries regarding this work, please do not hesitate to contact me via email: CDP@daera-ni.gov.uk or telephone: [REDACTED]

In light of the Covid 19 pandemic I can assure you that all Government issued guidelines will be followed and Personal Protective Equipment will be utilised, namely: regular washing of hands, use of sanitiser gels, and the use of gloves whilst undertaking duties at the site. It is not necessary for staff to meet up with you when we are on site.

Yours sincerely

5th May 2021

Dear [REDACTED]

**OWENKILLEW RIVER AREA OF SPECIAL SCIENTIFIC INTEREST (ASSI)
SITE MONITORING**

The annual process of ASSI monitoring is now underway. Monitoring is a vital part of the work of Northern Ireland Environment Agency (NIEA). We need to visit ASSIs on a regular basis to check that the plants, animals or earth science features that made them so important in the first place are still present and thriving.

In April 2002, we began a major programme of quality monitoring. The aim is to visit each ASSI at least once every six years to check on its "health". A monitoring visit of this rolling programme is now due.

This process involves NIEA staff (or occasionally other scientists employed by NIEA), looking at how well the plants, animals or earth science features are doing. We will then be able to tell whether the site is changing, and if this change is for the better or worse. If it is felt that there is potential for changes in the management of the land, we can arrange for a member of staff to contact you to discuss appropriate changes.

The above exercise is scheduled to take place during May 2021 and we will be accessing the site at this time. If you have any problems or queries regarding this work, please do not hesitate to contact me via email: CDP@daera-ni.gov.uk or telephone: [REDACTED]

SITE MONITORING**

The annual process of ASSI monitoring is now underway. Monitoring is a vital part of the work of Northern Ireland Environment Agency (NIEA). We need to visit ASSIs on a regular basis to check that the plants, animals or earth science features that made them so important in the first place are still present and thriving.

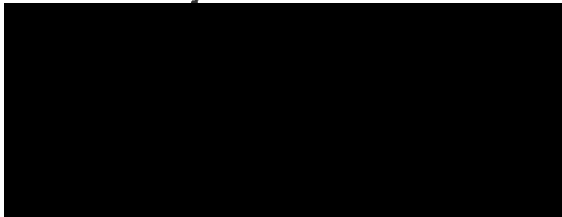

In April 2002, we began a major programme of quality monitoring. The aim is to visit each ASSI at least once every six years to check on its "health". A monitoring visit of this rolling programme is now due.

This process involves NIEA staff (or occasionally other scientists employed by NIEA), looking at how well the plants, animals or earth science features are doing. We will then be able to tell whether the site is changing, and if this change is for the better or worse. If it is felt that there is potential for changes in the management of the land, we can arrange for a member of staff to contact you to discuss appropriate changes.

The above exercise is scheduled to take place during May 2021 and we will be accessing the site at this time. If you have any problems or queries regarding this work, please do not hesitate to contact me via email: CDP@daera-ni.gov.uk or telephone: 

In light of the Covid 19 pandemic I can assure you that all Government issued guidelines will be followed and Personal Protective Equipment will be utilised, namely: regular washing of hands, use of sanitiser gels, and the use of gloves whilst undertaking duties at the site. It is not necessary for staff to meet up with you when we are on site.

Yours sincerely
