Company Reg: TI LirIC Limited - Company Number: 12300898

Request Date

29/09/2025

Current Licence(s) to be varied (ML number/Condition Number)

Marine Licence No.: ML2024009

Part 1: Particulars, Section 5: Licence Validity Dates

What do you want to vary on your current licence(s)?

The LirIC Project is not seeking any change to the scope of the works previously consented under Licence ML2024009. The originally approved methodologies, materials, and survey activities remain unchanged.

However, due to unforeseen project constraints, we were unable to complete all planned geotechnical survey works within the 2025 summer survey season. As such, we are requesting a variation to extend the validity period of the licence through to 04 September 2026. This extension will enable the completion of the remaining geotechnical survey activities as originally described in the initial application and supporting documentation.

This request relates specifically to **Part 1: Particulars, Section 5 – Survey Validity** of the Marine Survey Licence ML2024009 that details the validity dates of the licence (22 January 2025 to 22 January 2026). We request that this licence validity period be amended to reflect the revised expiry date of 04 September 2026, while all other conditions and operational parameters remain unchanged.

Why do you wish to request a variation your licence(s) in this way?

Due to unforeseen project constraints, the LirIC Interconnector Marine Surveying Team were unable to complete all planned work during the 2025 summer survey season. We are therefore requesting an extension of the license validity through to 04 September 2026 to allow sufficient time to complete the remaining geotechnical survey activities during the next available spring–summer weather window.

What date would the variation to the licence(s) come into effect?

23rd January 2026 (To provide an uninterrupted continuation of the existing license validity).

Privacy Notice

Developers and applicants should be aware that information related to a variation request may be subject to requests under the Freedom of Information Act 2000 and the Environmental Information Regulations 2004. The Act and Regulations provide for some exemptions from the need to disclose information, for example, if it is commercially sensitive. In cases where applicants consider that specific information is exempt from the requirements of the Act or the Regulations, the justification for their position should be provided below. The information provided in support of this application may be shared with other Government Departments or external organisations for the purposes of providing advice on technical issues with the proposal.

I acknowledge that this request and any resulting advice may be disclosed as part of any related Freedom of Information request.

I do not wish this request and any resulting advice disclosed as part of any related Freedom of Information request for the following reasons:

Public Register

Under section 101 of the Marine and Coastal Access Act 2009 DAERA must maintain a register of activities where it is the appropriate licensing authority. Information contained within or provided in support of this application will be placed on the DAERA Public Register. Section 101(5) of the Act prohibits inclusion in the register of certain information on the ground of national security or commercial confidentiality.

Is there any information in your application (including any supporting documents) that you believe should be withheld from the Public Register?
