

Note of meeting with [REDACTED] 10 April 2024

[REDACTED]

[REDACTED]

NIEA

[REDACTED]

[REDACTED]

[REDACTED] provided an update on progress against [REDACTED].

[REDACTED] [REDACTED] is in progress with the first set of inspections conducted in December 2023 and the next visual inspections are planned in June 2024.

[REDACTED] [REDACTED] requiring a site drainage plan. [REDACTED] outlined that the topographic levels are needed to complete this and will check the TetraTech report for figures. If they are not contained within the report NIEA will contact them to obtain. It was agreed that the plan subject to levels being received would be made available in 1 month's time.

AP

- [REDACTED] to check report for levels and contact NIEA if not available.
- NIEA to follow up in Mid-May 2024 regarding plan.

[REDACTED] [REDACTED]. [REDACTED] outlined some of the measures that are initially being considered such as willow planting and use of natural geotextiles. NIEA had indicated that permissions may need to be sought before work commences. NIEA will forward CDP details to [REDACTED] so as to enquire on permissions. [REDACTED] stated that when next report is produced in June that proposed bank protection measures will be included.

AP

- NIEA to obtain CDP contact and issue to [REDACTED].
- [REDACTED] to submit June report to NIEA on completion.

Following meeting [REDACTED] and [REDACTED] conducted a visual inspection of the site and lagoons. Discussion of placement of bank protection measures were had. Water levels in the lagoons were satisfactory. No pollution issues.
