Subject: XI: FEEDBACK ON 2024 ZOO NOSES AND FOOD-BORNE OUTBREAKS MONITORING DATA  
Date: 15 June 2025 11:58:00  
Attachments: [header.png](#)

Good Morning All

The feedback on 2024 Zoonoses and FBO has now been received. I have attached all files for your convenience.

- Please review excel Attachment titled **10\_XI\_2025-06-13.xlsx**. If a query applies to your work area add comments to column L, then return via email, we will then collate all the responses.
- You will also find "flat files" from the web-tool attached (i.e. **flat files of PREVALENCE, DISEASE STATUS, FBO**). Flat files are Excel files extracted from the EFSA Scientific data warehouse (DWH), with all data reported for 2024.
- The **National Zoonoses Report** and a Word file with important **EU summary tables** for zoonoses and food-borne outbreaks, is also attached to validate and review. The former file contains data reported in DWH and the provided text forms, while the latter displays tables with the most important statistics, based on provided data, such as *Salmonella* target verification in poultry, *Salmonella* on pig's carcasses and other important tables. These other files enable you to validate and review your data, statistics and narrative text.

Please provide your comments/ clarifications (if required) by return email by **Friday 20 June**. We will then collate returns and issue to EFSA.

Kind regards  
[REDACTED]

Subject: XI: FEEDBACK ON 2024 ZOO NOSES AND FOOD-BORNE OUTBREAKS MONITORING DATA

**XI: FEEDBACK ON 2024 ZOO NOSES AND FOOD-BORNE OUTBREAKS MONITORING DATA**

Dear Reporting Officer,

thank you very much for submitting 2024 Zoonoses and Food-borne outbreaks monitoring data, and for all your related efforts.

With this message, we provide you with the results of the first scientific data validation. Please act as appropriate.

- **Priority check flag**: some comments are flagged as important for you to consider. These comments are marked coloured and bold as **critical** and should be addressed during the first data correction period. If flagged wrong data are not corrected during the first data correction period, please provide a short explanation in the "Status" column

**Excel files**

- one Excel file with country-specific questions/comments that experts raised on the data submitted (or missing data) and on the text forms
- three country-specific "flat files" (one for each used data model)

**Other files**

I have also attached the National Zoonoses Report and a Word file with important EU summary tables for zoonoses and food-borne outbreaks. The former file contains data reported in DWH and the provided text forms, while the latter displays tables with the most important statistics, based on provided data, such as *Salmonella* target verification in poultry, *Salmonella* on pig's carcasses and other important tables. These other files enable you to validate and review your data, statistics and narrative text.

Please add at least one comment in the column 'Comment MS' otherwise the tool will reject the file.

**Comments on EU summary tables or on National Zoonoses Report**

Please send us your comments by email, while specifying the (copy-pasted) table title in case comments relate to the EU summary tables. Please send your revised text form, if needed, to [REDACTED]

For any problem you may experience please contact the ZOE Consortium functional email [REDACTED] copying [REDACTED]

**Data corrections in DCF**

Please perform the corrections required and replace the previous DCF data file/s. Note that, as all your files are in "submitted" status, you should have your previous transmission, which contains the errors that need to be amended, rejected before uploading the correct one. The rejection can be done in MicroStrategy by each of the data providers or can be done by EFSA on behalf of the data providers.

The DCF is opened again and will close on **29 June 2025**. See the below data collection and validation cycle for 2024 data, as agreed during our meeting of the Zoonoses Monitoring Data network in October 2024.

Thank you once more for all your efforts and cooperation.

Kind regards,

WP2 Staff
