† To be used undiluted

** The volume (mls) of water to which 1g of the product is to be added.

NOTE: Dilution rates for disinfectants for use against Foot and Mouth Disease and/or Swine Vesicular Disease relate to effectiveness when applied to a clean surface; i.e., one which has been:

- ✓ thoroughly washed or sprayed with an approved disinfectant;
- ✓ thoroughly cleansed, ensuring that dung, litter, etc is removed and disposed of so that there is no risk of contact with livestock

The clean area should then be washed or sprayed with an approved disinfectant, used at the correct dilution.
