Valuation	593	536	480	424	367	311	254

This table provides valuations for broiler breeders after transfer from the rearing house. It is based on standard-growing broilers; valuations for slow-growing broilers may be different.

The valuation is based on a maximum age of 60 weeks. If a flock is marginally older than this at the time of the outbreak, the final valuation shown here can still be used. For a younger flock expected to substantially exceed 60 weeks of age, a separate valuation may be required.

For flock ages that do not exactly match the weekly valuation increments, the appropriate pro-rata figure should be calculated.
