Planning Ref: LA02/2018/1145/F
WMU Ref: WMU/PC/ 30078-6

Good afternoon!

In response to the Planner's query, Water Management Unit can confirm that we have not been in receipt of any revised/comprehensive Emergency Management Plan, and we would still request sight of this document when it becomes available.

Water Management Unit would be content that this Emergency Management Plan be conditioned as part of the decision notice.

Water Management Unit's full response to this planning application can be seen in our document WMU/PC/ 30078-4 which contains general conditions, recommendations and advice.

In our response WMU/PC/ 30078-5 we provided the additional advice that "the Emergency Management Plan should contain the Oil Spill Contingency & Response Plan as well as details of firewater retention and management".

If the Planner requires any further information regarding our responses, we will be happy to assist.

Regards -

Dear Sir/Madam

I refer to our last consultation response from the Water Management Unit, dated 20/12/2021 and the previous response of 23/11/2021. The comments made in November noted the intention to provide a revised comprehensive Emergency Management Plan and requested sight of it when available. As the subsequent response of 20/12/2021 indicated that WMU had no further comments to make, can you confirm whether they have seen sight of the Emergency Management Plan, or are still awaiting its availability? If WMU are still awaiting sight of this Plan, can they confirm whether it is required before the granting of planning permission or can it be conditioned/included as advice on any decision notice?

Thanks

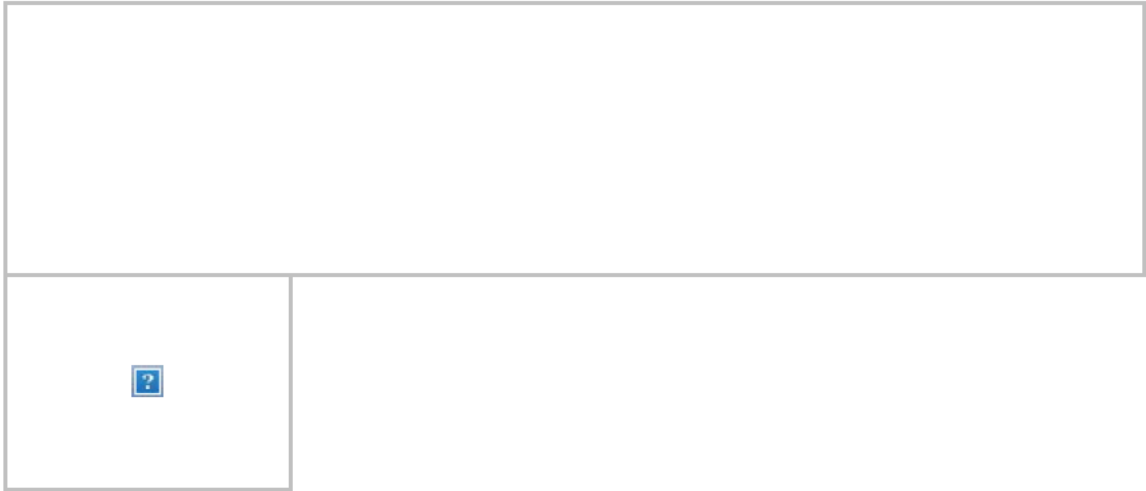

Regards
