

10. Broiler breeder rearing (parent)

All valuations expressed in pence per bird

Age (weeks)	1	2	3	4	5	6
Valuation	722	765	811	857	904	953

Age	7	8	9	10	11	12
Valuation	1003	1054	1106	1159	1212	1267

Age	13	14	15	16	17	18
Valuation	1322	1379	1436	1494	1554	1614

This table provides valuations for broiler breeders in rearing houses, before they are moved to egg laying accommodation. It is based on standard-growing broilers; valuations for slow-growing broilers may be different.

The table extends to 18 weeks of age. In the event that birds remain on the rearing farm for longer than this, the final valuation should be extrapolated forward, based on the final weekly difference.

The table shows 'per bird' valuations that are based on a typical ratio of females to males.

Valuation ages that do not exactly match the weekly increments shown in the table, should be calculated manually on a pro-rata basis.
