8. Vessel owners must accurately complete landing declaration or form NEP1 (landings of nephrops by vessels 10 metres and under in overall length) in respect of all landings over 12kgs of nephrops and submit it on a weekly basis to the Fishery Office at which the vessel is administered.

9. The vessel to which this licence relates shall only carry on board, electrical generating equipment required for safe navigation and safe operation of the vessel. The vessel shall not carry on board nor deploy into the sea any electrical equipment, including electrical generators, cables, probes, grids or any other equipment capable of transmitting electrical currents to the seabed.

10. Where the vessel to which this licence relates is expressly permitted at section 3 to fish for shellfish, the vessel owner must accurately complete the relevant return in respect of all landings **including Nil returns** of lobsters and crabs (DAERA: form MSR1) and submit it by the 15th calendar day of the month immediately following the month to which the return refers, to the Fishery Office at which the vessel is administered.

Prohibition on fishing in Strangford Lough

11.1 The vessel to which this licence relates is prohibited at all times from fishing in Strangford Lough, County Down, Northern Ireland, subject to the derogation in 11.3.

11.2 "Strangford Lough" means the area of sea to the northwest of an imaginary straight line drawn from Killard Point, County Down (54º 18.0'N and 5º 31.0'W) to Ballyquintin Point, County Down (54º 20.0'N and 5º 29.0'W)

11.3 By way of derogation from 11.1 the vessel to which this licence relates may deploy fishing gear within Strangford Lough if it holds, and complies with the conditions of, a valid

"Strangford Lough Fishery Licence"

Issued by the Department of Agriculture, Environment and Rural Affairs (Northern Ireland).

UK Celtic Sea Technical Measures

12.1 For the purposes of the conditions below, the Celtic Sea Protection Zone shall mean ICES divisions 7f, 7g, that part of ICES division 7h which is north of latitude 49° 30' N and that part of ICES division 7j which is north of latitude 49° 30' N and east of longitude 11° W.

12.2 Where the vessel fishes using bottom otter trawls or bottom seines (OTB, OTT, OTP, OT, PTB, PT, SSC, SDN, SPR, SX, SV, TBN, TBS, TB, TX) in those parts of British fishery limits which fall within the Celtic Sea Protection Zone it must use either:

(a) a codend with minimum 120 mm mesh size;
(b) a codend with minimum 110 mm mesh size and fitted with a square mesh panel with 120 mm minimum mesh size.

12.3 Where the vessel fishes using otter trawls or bottom seines in those parts of British fishery limits which fall within ICES divisions 7e-j other than those referred to in condition 12.2 above, it must use a codend with minimum 100 mm mesh size, and when fishing west of longitude 5° W it must also use a square mesh panel with minimum 100 mm mesh size.

12.4 Where the vessel fishes using otter trawls or bottom seines in ICES divisions 7e-j, it must use a codend that is constructed of a single twine of a maximum of 6 mm or a double twine of a maximum of 4 mm.

12.5 Where the vessel fishes using otter trawls or bottom seine in ICES divisions 7e-j, other than when targeting nephrops, it must not use or carry on board a strengthening bag[1].

12.6 The obligation in condition 12.2 does not apply to a vessel which fishes using otter trawls or bottom seines in ICES division 7f within 12 nm of the baseline from which the breadth of the territorial sea adjacent to the United Kingdom is

measured, which must instead use a codend with minimum 100 mm mesh size and square mesh panel with minimum 100 mm mesh size.

12.7 The obligation in conditions 12.2 and 12.3 do not apply to a vessel whose catch comprises 30% or more of nephrops, which must instead use an 80mm codend plus one of the following gear configurations (a-d):

(a) a 300 mm square mesh panel

(b) Seltra panel (consists of a top panel of 300 mm square mesh, placed in a four-panel box section, in the straight section of a codend; is at least 3 metres long; is positioned no more than 4 metres from the codline; is the full width of the top sheet of the box section of the trawl (selvedge to selvedge));

(c) Nordmøre sorting grid (selectivity device which consists of a rigid grid with a maximum bar spacing of 35 mm);

(d) Netgrid device (a selectivity device consisting of a four-panel section inserted into a two-panel trawl with an inclined sheet of diamond mesh netting with a maximum mesh size of 200 mm leading to an escape hole in the top of the trawl).

12.8 The obligation in condition 12.2 does not apply to a vessel whose catch comprises more than 55% anglerfish, hake and megrim combined, which must use a codend with minimum 100 mm mesh size and square mesh panel with minimum 100 mm mesh size.

12.9 The obligation in condition 12.2 does not apply to a vessel which fishes solely in ICES division 7f to the east of longitude 5° W, and whose combined amount of cod, haddock and saithe does not exceed 10%, which may instead use a codend with minimum 80 mm mesh size and a square mesh panel with minimum 120 mm mesh size.

12.10 The obligation in condition 12.2, condition 12.3 or condition 12.6 does not apply to a vessel which fishes west of longitude 5° W in ICES divisions 7e, or in ICES division 7f within 12 nm of the baseline from which the breadth of the territorial sea adjacent to the United Kingdom is measured, provided that the vessel instead uses a 100 mm single twine codend with maximum 5 mm twine thickness, derogating from the twine thickness requirements in 12.4.

12.11 By way of derogation to points 12.2, 12.3 and 12.6 – 12.10 above, vessels of 12 metres overall length or less and an engine power of 221 kW or less fishing within 12 nm of the United Kingdom in ICES area 7e east of 5° W, may fish in accordance with Regulation (EU) 2019/1241 of the European Parliament and of the Council of 20 June 2019 on the conservation of fisheries resources and the protection of marine ecosystems through technical measures.

12.12 Square mesh panels as referred to in this condition shall be placed into the top panel of the codend. The rearmost edge of the square mesh panel, which is the part closest to the codline, shall be no more than 9 metres from the codline.

Single Area Licencing

13.1 Where the vessel deploys beam trawls within that part of British Fishery Limits which falls within ICES area 7e east of 5 degrees west ('the relevant area'), it may not fish in any other ICES area within British Fishery Limits during the same voyage. For any voyage where beam trawls are deployed in the relevant area the vessel must depart from and return to (and only to) a UK port.

13.2 The vessel shall be exempt from the provisions in condition 13.1 provided the following requirements are met;

(a) The master, owner or (where appropriate) the charterer vessel contacts the UKFMC at least 4 hours and no more than 8 hours prior to entry into the area in the relevant area and, if requested, facilitates an inspection of the vessel at a position and time provided by the MMO FMC Operations team, prior to commencing fishing operations;. and,

(b) the master, owner or (where appropriate) the charterer vessel contacts the UKFMC at least 4 hours and no more than 8 hours before leaving the relevant area and, if requested, facilitates an inspection of the vessel at a position and time provided by the MMO FMC Operations team, before leaving the relevant area.

13.3 The notification at 13.2(a) shall contain the following information:

Subject heading: NOTIFICATION OF ENTRY INTO SOLE RECOVERY ZONE RELEVANT AREA
The name, external identification, and international radio call sign of the vessel;
The name of the master of the vessel;
Date/time/location of intended entry into the area and the intended commencement of fishing activity in the relevant area in the following format:

in respect of the position of entry, the approximate latitude and longitude of the position at which the vessel will enter the area, and
in respect of intended fishing grounds, the ICES statistical rectangles in which fishing operations will be commenced.
The total quantity of sole retained on board in kilograms live weight.

13.4 The notification at 13.2(b) shall contain the following information:

Subject heading: NOTIFICATION OF EXIT FROM
SOLE RECOVERY ZONE RELEVANT AREA
The name, external identification, and international radio call sign of the vessel;
The expected date/time/location of exiting the relevant area.
The total quantity of sole retained on board in kilograms live weight.

13.5 If, at the point the vessel enters the area the quantity of sole retained on board is different to the quantity reported in accordance with condition 13.3 above then the master, owner or (where appropriate) the charterer of the vessel must immediately, and before commencing fishing operations, notify the UKFMC of the quantity of sole retained on board.

13.6 The vessel may not be present in the relevant area whilst carrying beam trawls on board other than in accordance with condition 13.1 and 13.2 or when transiting at a speed of greater than six knots (except in the case of force majeure or adverse conditions) or when in port. Beam trawls carried on board the vessel must be properly lashed and stowed in such a way that it may not be used readily and to avoid any doubt of its deployment in the water.

Marine Mammal Bycatch Reporting Requirements

14.1 Where the vessel undertakes fishing activities the result of which causes or contributes to the mortality of or injury to any species of marine mammal, or where such species are taken as bycatch (regardless of whether such catches are retained on board) the master, owner, charterer, as appropriate, of the vessel to which this licence relates must complete and submit to the Marine Management Organisation a marine mammal injury reporting form in accordance with the guidance provided at https://www.gov.uk/government/publications/marine-mammal-bycatch-reporting-requirements no later than 48 hours after the vessel returns to port.

- the east coast of Ireland at latitude 53° 50’N.

from 00.01 hours on 21 September to 23.59 hours on 31 December.

15.2 By way of derogation from 37.1 the vessel may deploy drift nets within the restricted area if it holds, and complies with the conditions of, a valid Mourne Shore Herring Fishery licence, as issued by the Department of Agriculture, Environment and Rural Affairs (Northern Ireland).
