

**The Avian Influenza and Influenza
of Avian Origin in Mammals Regulations
(Northern Ireland) 2007 (“the Regulations”),
Regulation 6.**

Declaration of an Avian Influenza Prevention Zone

The Department of Agriculture, Environment and Rural Affairs (“the Department”) has carried out a risk assessment in accordance with the provisions of regulation 6(1) of the Avian Influenza and Influenza of Avian Origin in Mammals Regulations (Northern Ireland) 2007 (“the Regulations”).

In order to reduce the risk of incursion of avian influenza in poultry or other captive birds from wild birds or from any other source, the Department considers it necessary to declare the whole of Northern Ireland as set out in Schedule 3 as an Avian Influenza Prevention Zone, in accordance with the provisions of regulation 6(1)(a) of the above Regulations.

Measures applying within the Avian Influenza Prevention Zone

Any person in charge of poultry and captive birds must take all appropriate and practicable steps to reduce the risk of transmission of avian influenza to poultry and other captive birds. The following risk mitigation measures apply within the zone.

- 1 All keepers of poultry and other captive birds in Northern Ireland must comply with the minimum biosecurity measures in Part 1 of Schedule 1 to this declaration and where poultry or captive birds have access to outdoor areas, keepers must comply with the requirements of Part 2 of that Schedule.
- 2 All keepers of 500 or more poultry or other captive birds must additionally comply with the measures in Schedule 2 to this declaration. Keepers of poultry or other captive birds at a Zoo are exempted from the requirements of Schedule 2.
- 3 All keepers of poultry and captive birds must comply with the requirements of Schedule 3.
- 4 Keepers of poultry or other captive birds at a zoo may apply the measures in Schedule 4, as an alternative to complying with Schedule 3

- 5 These measures apply from 00.01 on 23 December 2020 and shall remain in force until the declaration is otherwise amended or revoked by further declaration.
- 6 This Declaration revokes and replaces the Declaration of an Avian Influenza Prevention Zone made at 00.01 on 01 December 2020.
- 7 This Declaration is made under regulation 6(1) of the Avian Influenza and Influenza of Avian Origin in Mammals Regulations (Northern Ireland) 2007

Signed

Robert Huey
Department of Agriculture, Environment and Rural Affairs
Dundonald House
Upper Newtownards Road
Belfast
BT4 3SB
Time 1200 Date 22 December 2020

Authorised by the Department of Agriculture, Environment and Rural Affairs
Failure to comply with this Declaration may be an offence under article 52 of the Diseases of Animals (Northern Ireland) Order 1981 and where found guilty of an offence shall be liable on summary conviction to a maximum fine of £5,000.

Notes:

“**poultry**” means a bird reared or kept in captivity for the production of meat or eggs for consumption, or of other products, for restocking supplies of game or for the purposes of any breeding programme for the production of such categories of birds;

“**other captive bird**” means a bird kept in captivity which is not poultry and includes a pet bird and a bird kept for shows, races, exhibitions, competitions, breeding or for sale;

Vehicles used to transport poultry or other captive birds shall be cleansed and disinfected in accordance with The Transport of Animals and Poultry (Cleansing and Disinfection) Order (Northern Ireland) 2007.

Nothing in this Declaration removes obligations on keepers of poultry or other captive birds from existing animal welfare requirements, and private veterinary advice should be sought by a keeper who is concerned about the suitability of housing conditions.

REVOKED 14 April 2021

Schedule 1 - Minimum biosecurity measures applying to all keepers

Any keeper of poultry (including game birds and pet birds) or other captive birds, irrespective of how they are kept, must take appropriate and practicable steps, that can be demonstrated to an inspector on request, to ensure that—

- (1) precautions are taken to avoid the transfer of virus contamination between premises, including cleansing and disinfection of equipment, vehicles and footwear. Place a foot dip containing an approved poultry disinfectant, at the correct concentration, at strategic points including at the entry and exit of all houses or outdoor areas where birds are kept, and footwear must be cleaned using the dips on entry and exit or alternatively footwear should be changed when moving between bird and non-bird areas;
- (2) feed, water and bedding are stored to minimise the risk of virus contamination;
- (3) effective vermin control is carried out in any part of the premises where poultry or other captive birds are kept;
- (4) the movement of people, vehicles or equipment to and from the part of the premises where poultry are kept is reduced to only essential movements for looking after their welfare, collecting eggs and feeding or movements for official or inspection visits;
- (5) records are kept (other than in a zoo) of all vehicles that enter any part of the premises where poultry are kept and of all people who come into any direct contact with the poultry.
- (6) records of poultry, captive birds and egg movements must be kept and made available to an inspector or veterinary inspector on demand. Records should include:
 - the quantity and description (including species of bird or type of egg) transported or marketed;
 - the date of the movement off the premises;
 - the premises of destination (if known);
 - the name and address of the person to whom ownership or possession is being or has been transferred;
- (7) buildings that house the birds are maintained and any defects that allow water ingress or other contamination to enter the building are rectified without undue delay.
- (8) there is no direct contact with poultry or other captive birds on other neighbouring premises;

(9) ducks and geese should not be kept in the same pen or building as other poultry species.

Revoked 14 April 2021

Schedule 2 – Enhanced biosecurity measures for premises with over 500 poultry or other captive birds

(1) Any keeper of more than 500 poultry or other captive birds must, in addition to the minimum measures set out in Schedule 1, apply the following enhanced biosecurity measures in these separate parts of the poultry premises–

- (a) a poultry/captive bird (live-bird) part (for example, in the Lion code this area is referred to as the ‘Specific’ area; and in Red Tractor as ‘defined biosecure areas’); and
- (b) a private (ancillary use) part (for example, in the Lion code this area is referred to as the ‘General’ area; and in Red Tractor as ‘defined biosecure areas’); and
- (c) a restricted access (biosecure barrier) part.

(2) The following measures apply to a poultry/captive bird (live-bird) part of the premises–

- (a) access is restricted to essential authorised personnel only;
- (b) keepers must operate effective barrier hygiene, including changing clothing and footwear, before entering and on exit from the live-bird part;
- (c) only essential equipment and vehicles are permitted to enter the live-bird part;
- (d) the exterior of any vehicles, including fork-lifts and pallet trolleys (particularly wheels and wheel arches) and equipment which enter or leave the live-bird part of the premises must be cleansed and disinfected on both entry and exit; and
- (e) thorough cleansing and disinfecting (based on industry best practice) of housing and equipment must be undertaken at the end of a production cycle and before new birds are introduced; and
- (f) records must be kept of vehicles and personnel entering and leaving the live-bird part.

(3) The following measures apply to a private (ancillary use) part of the premises–

- (a) access is limited to essential personnel only, and full biosecurity practices should be adopted on entry and exit to the part of the premises;
- (b) this part of the premises should be fully separated from the live-bird part with a clear demarcation;
- (c) waste and fallen stock must be held in appropriately biosecure facilities in this part of the premises with clear separation between both the live-bird part and the restricted access biosecure barrier part; and
- (d) the exterior of any vehicles (focussing on wheels and wheel arches) which enters or leaves the part must be cleansed and disinfected on both entry and exit.
- (e) egg producers should ensure the packing, handling and storage of second quality eggs / farm seconds is managed in a biosecure manner. Plastic egg trays must be cleansed and disinfected before use and records maintained as detailed in Schedule 1 (6).

(4) The following measures apply to the restricted access (biosecure barrier) part of the premises–

- (a) access by the public should be controlled and only essential workers or contractors should enter this biosecure barrier part; and

(b) non-essential vehicles must not enter this biosecure barrier part.

(c) Keepers must regularly inspect the fabric and structural integrity of any building used to house poultry for holes and leaks, with particular emphasis on roofs, gutters and downpipes. Any holes and leaks must be repaired without undue delay as recent cases of avian influenza have been linked to water ingress and flooding.

Revoked 14 April 2021

Schedule 3 –Requirements for keepers of poultry or other captive birds within the Avian Influenza Prevention Zone

- (1) All keepers must ensure that all poultry or other captive birds are kept housed in accordance with the following conditions –
 - (a) the buildings must be suitable for the purpose and checked/inspected regularly that they continue to be;
 - (b) any openings must be covered with suitable mesh or netting which should be of a maximum size of 25mm mesh to prevent ingress from wild birds,
- (2) Where it is not reasonably practicable for a keeper to comply with paragraph (1), the keeper must ensure that all poultry or other captive birds are kept in fully enclosed or netted outdoor areas subject to–
 - a) the outdoor area being fully enclosed with wire mesh, netting or other material which is capable of preventing ingress of wild birds any mesh or netting which should be of a maximum size of 25mm (2(a) does not apply to poultry kept for restocking supplies of game);
 - b) preventing direct contact with poultry or other captive birds on other premises;
 - c) preventing direct or indirect contact with wild birds and, in so far as is reasonably practicable, direct or indirect contact with feathers or faecal material from wild birds;
 - d) before placing any new structures or enclosures on land for the purpose of keeping poultry or other captive birds outdoors, the keeper must arrange for the inspection of the relevant site for feathers and faecal matter from wild birds and, if such material is discovered, remove such material;
 - e) providing feed and water under cover where wild birds cannot gain access;
 - f) ensuring wild birds are not attracted to the vicinity of the outdoor area, in particular to standing water or ponds; and,
 - g) regular inspection of the site and consideration that these conditions continue to be met, minimising the risk of contact with wild birds

REVOKED

Schedule 4 – Zoos

- (1) To the extent that it is not reasonably practicable for a keeper at a zoo to comply with the requirements of paragraph 5 of the Declaration and Schedule 3, that keeper must take such measures as are reasonable and practicable to prevent potential disease spread including–
- (a) isolating groups of captive birds not housed or fully enclosed in outdoor areas from all other poultry and other captive birds;
 - (b) assessing the risk of public access to indoor captive bird enclosures;
 - (c) controlling entry to outdoor captive bird enclosures including limiting to essential persons;
 - (d) requiring persons to wear suitable personal protective equipment in particular if in direct contact with the captive birds;
 - (e) disinfectant mats must be installed at all points of entry and exit at the zoo that are for use by visiting members of the public, if members of the public are to be admitted to areas of the zoo in which poultry or other captive birds are kept ;
 - (f) handwashing facilities must be made available to visiting members of the public if the public are to be admitted to areas of the zoo in which poultry or other captive birds are kept; and
 - (g) in consultation with a private veterinarian, producing robust justification for any deviation and demonstrate the zoo has measures in place to minimize any disease spread from such un-netted outdoor enclosures.

REVOKED 14 APRIL 2021

Schedule 5 - Avian Influenza Prevention Zone

The Avian Influenza Prevention Zone applies to the whole of N. Ireland
