

## DAERA EXPORT HEALTH CERTIFICATION ON LINE

### EXPORTER INFORMATION NOTICE - 01/2020

#### ***Dairy Commodity Exports: Export Health Certificate (EHC) Applications for Mixed Product***

DAERA recognises that, on occasion, dairy exporters may have an outgoing consignment which contains mixed dairy products (for example, Butter and Milk).

When making a DECOL application, such exporters should note that a single DECOL application is regarded as appropriate, providing the following criteria are met:

- **All products** within the consignment are bound for the **same destination**, and;
- **All products** have the same requirements and treatments.

If **both** statements apply to the mixed product consignment, exporters should select 'Dairy (miscellaneous)' at Step 1 of the application process:

\* Commodity

Please select an option
Animal By-product
Aquaculture: e.g Farmed Fish
Beef
Dairy (bulk milk)
Dairy (butter)
Dairy (cheese)
Dairy (milk powder)
Dairy (miscellaneous)
