

**Local Management Areas**

# Reasons for status for the water bodies within the Braid and Main LMA

December 2014

**Water body name:** Braid River  
**Water body identification code:** UKGBNI1NB030302010

**Catchment stakeholder group:** Lower Neagh Bann  
**Local management area:** Braid and Main  
**2015 Objective:** Good Status  
**2021 Objective:** Good Status  
**2027 Objective:** Good Status

**2005 risk assessment:** 1b - Likely to be at risk

	2009	2010	2011	2012	2013	2014
<b>Overall status:</b>	Moderate	Moderate	High	Good	Moderate	Moderate
<b>Confidence in overall status:</b>	Medium	Medium	Low	Medium	Medium	Medium
Ammonia	High	High	High	High	High	High
Benthic Invertebrates	Good	Good		High	High	High
Dissolved oxygen	High	High	High	High	High	High
Fish	Moderate	Moderate	High			
Macrophytes	High	High		Good	Good	Good
pH	High	High	High	High	High	High
Phytobenthos					Moderate	Moderate
Soluble reactive phosphate	High	High	High	High	High	High
Biochemical oxygen demand*	High	High	High	High	High	High
Temperature*	High	High	High	High	High	High
Hydrological regime	High	High	High	High	High	High
Morphological conditions				Moderate	Moderate	Moderate
Copper (dissolved)	Pass	Pass			Pass	Pass
Zinc (total)	Pass	Pass			Pass	Pass

\* This element does not contribute to overall classification.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

For more information on the classification process see:

[www.doeni.gov.uk/niea/neagh-riversandlakes](http://www.doeni.gov.uk/niea/neagh-riversandlakes)

**Water body name:** Clogh River  
**Water body identification code:** UKGBNI1NB030302011

( Confidence in overall status: Medium )

---

### Reasons for setting alternative objectives

#### Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

<b>Water body name:</b>	Deerfin Burn

( Confidence in overall status: Low )

---

### Reasons for setting alternative objectives

#### **Technically infeasible - Cause of adverse impact unknown**

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.
