

Local Management Areas

Reasons for status for the water bodies within the River Blackwater LMA

December 2014

Water body name: River Rhone
Water body identification code: UKGBNI1NB030307025
This is a heavily modified water body.
Catchment stakeholder group: Upper Neagh Bann
Local management area: River Blackwater
2015 Objective: Poor ecological potential
2021 Objective: Moderate ecological potential
2027 Objective: Good ecological potential

2005 risk assessment: 1a - At risk

	2009	2010	2011	2012	2013	2014
Overall status:	BEP	BEP	BEP	BEP	BEP	BEP
Confidence in overall status:	Low	Low	Low	Low	Unmeasured	Low
Benthic Invertebrates	Bad	Bad	Bad	Bad		Bad
Macrophytes						Good
Hydrological regime	High	High	High	High	High	High
Morphological conditions				Moderate	Moderate	Moderate

* This element does not contribute to overall classification.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

For more information on the classification process see:
www.doeni.gov.uk/niea/neagh-heavily-modified

Water body name: Callan River
Water body identification code: UKGBNI1NB030307026

Catchment stakeholder group: Upper Neagh Bann
Local management area: River Blackwater
2015 Objective: Moderate Status
2021 Objective: Good Status
2027 Objective: Good Status

2005 risk assessment: 1a - At risk

	2009	2010	2011	2012	2013	2014
Overall status:	Moderate	Moderate	Moderate	Moderate	Moderate	Moderate
Confidence in overall status:	High	High	High	Medium	Medium	Medium
Ammonia	Good	Good	Good	High	High	High
Benthic Invertebrates	Moderate	Moderate	Moderate	Moderate	Moderate	Moderate
Dissolved oxygen	Moderate	Moderate	Moderate	Moderate	Moderate	Good
Macrophytes	Moderate	Moderate	Moderate	Moderate	Moderate	Moderate
pH	High	High	High	High	High	High
Phytobenthos			Moderate	Moderate		
Soluble reactive phosphate	Moderate	Moderate	Good	Good	Good	Good
Biochemical oxygen demand*	Good	Good	Moderate	Moderate	Moderate	Good
Temperature*	High	High	Good	Good	Good	Good
Hydrological regime	Good	Good	Good	Moderate	Moderate	Moderate
Morphological conditions	¹ Moderate	¹ Moderate	¹ Moderate	¹ Moderate	¹ Moderate	¹ Moderate
Copper (dissolved)	Pass	Pass			Pass	Pass
Zinc (total)	Pass	Pass			Pass	Pass

* This element does not contribute to overall classification.

¹ Morphology is classified as moderate or worse because a full survey has not yet been completed.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

For more information on the classification process see:

www.doeni.gov.uk/nia/neagh-riversandlakes

Water body name: River Blackwater
Water body identification code: UKGBNI1NB030307027

Catchment stakeholder group: Upper Neagh Bann
Local management area: River Blackwater
2015 Objective: Moderate Status
2021 Objective: Good Status
2027 Objective: Good Status

2005 risk assessment: 1a - At risk

	2009	2010	2011	2012	2013	2014
Overall status:	Poor	Poor	Poor	Poor	Good	Poor
Confidence in overall status:	Medium	Medium	Medium	Medium	Medium	Low
Ammonia	High	High	High	High	High	High
Benthic Invertebrates	Moderate	Moderate	Moderate	Moderate	Good	Good
Dissolved oxygen	Moderate	Moderate	Moderate	Moderate	Good	Poor
Fish						Poor
Macrophytes	Good	Good	Good	Good	Good	High
pH	High	High	High	High	High	High
Phytobenthos	Poor	Poor	Poor	Poor		
Soluble reactive phosphate	Good	Good	Good	Good	Good	High
Biochemical oxygen demand*	Good	Good	Good	Good	Good	Moderate
Temperature*	High	Good	Good	Good	Good	Moderate
Hydrological regime	High	High	High	High	High	High
Morphological conditions						Moderate
Anthracene					Pass	Pass
Copper (dissolved)	Pass	Pass			Pass	Pass
2,4-D		Pass	Pass	Pass	Pass	Pass
2,4-D ester		Pass	Pass	Pass	Pass	Pass
Diazinon	Pass	Pass	Pass	Pass	Pass	Pass
2,4-dichlorophenol		Pass	Pass	Pass	Pass	Pass
Fluoranthene					Pass	Pass
Linuron		Pass	Pass	Pass	Pass	Pass
Mecoprop		Pass	Pass	Pass	Pass	Pass
Naphthalene					Pass	Pass
Phenol	Pass	Pass	Pass	Pass	Pass	Pass
Polyaromatichydrocarbons (PAH)					Pass	Pass
Toluene		Pass	Pass	Pass	Pass	Pass
Zinc (total)	Pass	Pass			Pass	Pass

* This element does not contribute to overall classification.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

Water body name:	River Blackwater 6
Water body identification code:	UKGBNI1NB030308199
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2009 overall status:	Poor	
(Confidence in overall status:	Medium)	

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Derrycorry Tributary
Water body identification code:	UKGBNI1NB030308200
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2009 overall status:	Moderate	
(Confidence in overall status:	Not measured)	

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Cor River Upper
Water body identification code:	UKGBNI1NB030307098
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Not measured)

Reasons for setting alternative objectives

Technically infeasible - Problem cannot be addressed because of lack of action by other countries

The water body is shared between Northern Ireland and the Republic of Ireland and the problem cannot be resolved until working arrangements are in place to resolve the adverse impact within an agreed timescale.

Water body name:	Cor River Lower
Water body identification code:	UKGBNI1NB030307099
Catchment stakeholder group:	Upper Neagh Bann

------------------------------	--------------

2009 overall status:	Moderate	
(Confidence in overall status:	Medium)	

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	River Rhone
Water body identification code:	UKGBNI1NB030307025 <i>This is a heavily modified water body.</i>
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Poor ecological potential
2021 Objective:	Moderate ecological potential
2027 Objective:	Good ecological potential
2005 risk assessment:	1a - At risk
2009 ecological potential:	Bad 
(Confidence in ecological potential:	Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	River Blackwater
Water body identification code:	UKGBNI1NB030307027
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Medium)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Callan River
Water body identification code:	UKGBNI1NB030307028
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Moderate 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

Water body name:	Oona Water
Water body identification code:	UKGBNI1NB030307033
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1b - Likely to be at risk

2009 overall status: Moderate 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Oona Water
Water body identification code:	UKGBNI1NB030307034

Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1b - Likely to be at risk

2009 overall status: Moderate 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Oona Water
Water body identification code:	UKGBNI1NB030307035
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1b - Likely to be at risk

2009 overall status: Moderate 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	River Rhone
Water body identification code:	UKGBNI1NB030307036
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Oona Water tributary
Water body identification code:	UKGBNI1NB030307037
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Not measured)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Oona Water
Water body identification code:	UKGBNI1NB030307038
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1b - Likely to be at risk

2009 overall status: Moderate 
(Confidence in overall status: Medium)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Blackwater Aughnacloy
Water body identification code:	UKGBNI1NB030307041
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Curlagh tributary Blackwater
Water body identification code:	UKGBNI1NB030307042
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Medium)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Callan River
Water body identification code:	UKGBNI1NB030307044
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Moderate 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

Water body name:	Ballymortrim Water
Water body identification code:	UKGBNI1NB030307045
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Tall River Flush
Water body identification code:	UKGBNI1NB030307047
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1b - Likely to be at risk

2009 overall status: Moderate 
(Confidence in overall status: Not measured)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Drumard Burn Blackwater
Water body identification code:	UKGBNI1NB030307050
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Bad 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Tall River
Water body identification code:	UKGBNI1NB030307106
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Bad 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Tall River
Water body identification code:	UKGBNI1NB030307108
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Bad 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Killeen Water
Water body identification code:	UKGBNI1NB030307109 <i>This is a heavily modified water body.</i>
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate ecological potential
2021 Objective:	Good ecological potential
2027 Objective:	Good ecological potential
2005 risk assessment:	1a - At risk
2009 ecological potential:	Bad 
(Confidence in ecological potential:	Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Blackwater tributary
Water body identification code:	UKGBNI1NB030307180
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1b - Likely to be at risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	River Blackwater
Water body identification code:	UKGBNI1NB030307095
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Medium)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Tall River
Water body identification code:	UKGBNI1NB030307129
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	River Blackwater
2015 Objective:	Poor Status
2021 Objective:	Moderate Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Bad 
(Confidence in overall status: Low)

Reasons for setting alternative objectives
