

Local Management Areas

Reasons for status for the water bodies within the Upper Bann LMA

December 2014

Water body name: River Bann
Water body identification code: UKGBNI1NB030308088

Catchment stakeholder group: Upper Neagh Bann
Local management area: Upper Bann
2015 Objective: Good Status
2021 Objective: Good Status
2027 Objective: Good Status

2005 risk assessment: 1b - Likely to be at risk

	2009	2010	2011	2012	2013	2014
Overall status:	Moderate	Moderate	Good	Moderate	Moderate	Moderate
Confidence in overall status:	Low	Low	Low	Low	Medium	Medium
Ammonia	High	High	High	High	High	High
Benthic Invertebrates	Good	Good		Moderate	Good	Good
Dissolved oxygen	High	High	High	High	High	High
Macrophytes	Moderate	Moderate			High	High
pH	High	High	High	High	High	High
Phytobenthos					High	High
Soluble reactive phosphate	High	High	High	High	High	High
Biochemical oxygen demand*	High	High	High	High	High	High
Temperature*	High	High	Good	High	High	High
Hydrological regime	Poor	Poor	Poor	Poor	Good	Good
Morphological conditions	¹ Moderate	¹ Moderate	¹ Moderate	Good	Good	Good
Copper (dissolved)	Fail	Fail			Fail	Fail
Zinc (total)	Pass	Pass			Pass	Pass

* This element does not contribute to overall classification.

¹ Morphology is classified as moderate or worse because a full survey has not yet been completed.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

For more information on the classification process see:

www.doeni.gov.uk/nia/neagh-riversandlakes

Water body name: River Bann Upper
Water body identification code: UKGBNI1NB030308089
This is a heavily modified water body.
Catchment stakeholder group: Upper Neagh Bann
Local management area: Upper Bann
2015 Objective: Good ecological potential
2021 Objective: Good ecological potential
2027 Objective: Good ecological potential

2005 risk assessment: 1a - At risk

	2009	2010	2011	2012	2013	2014
Overall status:	MEP	MEP	MEP	MEP	MEP	MEP
Confidence in overall status:	Medium	Medium	Medium	Medium	Medium	Medium
Ammonia	High	High	High	High	High	High
Benthic Invertebrates	Good	Good	Good	Good	Good	Good
Dissolved oxygen	High	High	Good	High	High	High
Fish		Good				
Macrophytes	Good	Good	Good	Good	Good	Good
pH	High	High	High	High	High	High
Phytobenthos					Good	Good
Soluble reactive phosphate	High	High	High	High	High	High
Biochemical oxygen demand*	High	High	High	High	High	High
Temperature*	High	High	High	High	High	High
Hydrological regime	Bad	Bad	Bad	Bad	Poor	Poor
Morphological conditions				Moderate	Moderate	Moderate

* This element does not contribute to overall classification.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

For more information on the classification process see:
www.doeni.gov.uk/niea/neagh-heavily-modified

Water body name: Annagh River
Water body identification code: UKGBNI1NB030308091

Catchment stakeholder group: Upper Neagh Bann
Local management area: Upper Bann
2015 Objective: Moderate Status
2021 Objective: Good Status
2027 Objective: Good Status

2005 risk assessment: 1a - At risk

	2009	2010	2011	2012	2013	2014
Overall status:	Poor	Bad	Bad	Bad	Bad	Bad
Confidence in overall status:	Low	Low	Low	Low	Low	Low
Benthic Invertebrates	Poor	Poor	Poor	Bad	Bad	Bad
Fish		Bad	Bad			
Macrophytes	Moderate	Moderate	Moderate	Moderate	High	High
Phytobenthos					Poor	Poor
Hydrological regime	High	High	High	High	High	High

* This element does not contribute to overall classification.

The yearly classifications are based on monitoring data up to the end of the previous year where available. Data more than 6 years old is not used for classifications. Elements were not classified in a particular year if they were not monitored during the previous 6 years.

For more information on the classification process see:
www.doeni.gov.uk/nia/neagh-riversandlakes

Water body name: Cusher River
Water body identification code: UKGBNI1NB030308092

Catchment stakeholder group: Upper Neagh Bann
Local management area: Upper Bann
2015 Objective: Moderate Status
2021 Objective: Good Status
2027 Objective: Good Status

2005 risk assessment: 1a - At risk

	2009	2010	2011	2012	2013	2014

Water body name:	Cusher River
Water body identification code:	UKGBNI1NB030308107
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Moderate 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Creggan River
Water body identification code:	UKGBNI1NB030308113
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann

Water body identification code:	UKGBNI1NB030308117
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Cusher River at Lough Gilly
Water body identification code:	UKGBNI1NB030308118
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Gosford River Cusher
Water body identification code:	UKGBNI1NB030308119
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Not measured)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Mowhan River
Water body identification code:	UKGBNI1NB030308120
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Balloollymore Burn Bann
Water body identification code:	UKGBNI1NB030308186
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Poor 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Drumadonnell River
Water body identification code:	UKGBNI1NB030308187
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Moderate 
(Confidence in overall status: Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	River Bann
Water body identification code:	UKGBNI1NB030308189
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment:	1a - At risk
------------------------------	--------------

2009 overall status:	Moderate	
(Confidence in overall status:	Medium)	

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

Water body name:	Muddock River
Water body identification code:	UKGBNI1NB030308188 <i>This is a heavily modified water body.</i>
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate ecological potential
2021 Objective:	Good ecological potential
2027 Objective:	Good ecological potential
2005 risk assessment:	1a - At risk
2009 ecological potential:	Poor 
(Confidence in ecological potential:	Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Corcrain River
Water body identification code:	UKGBNI1NB030308110
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate Status
2021 Objective:	Good Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Moderate 
(Confidence in overall status: Medium)

Reasons for setting alternative objectives

Natural conditions - Ecological recovery time

The time taken for the plants and animals to re-colonise and become established after the chemical and physicochemical or hydromorphological conditions have been restored to 'good'; or the time taken for the habitat conditions to 'stabilise' after improvement works have been implemented, will cause a delay in reaching good status until after 2015.

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	River Bann Bannfoot
Water body identification code:	UKGBNI1NB030308103 <i>This is a heavily modified water body.</i>
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate ecological potential
2021 Objective:	Good ecological potential
2027 Objective:	Good ecological potential
2005 risk assessment:	1a - At risk
2009 ecological potential:	Poor 
(Confidence in ecological potential:	Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Technically infeasible - Practical constraints of a technical nature

Practical constraints of a technical nature prevent implementation of the measure by an earlier deadline.

Water body name:	Lough Gullion
Water body identification code:	UKGBNI3NB0018
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Poor Status
2021 Objective:	Moderate Status
2027 Objective:	Good Status

2005 risk assessment: 1a - At risk

2009 overall status: Bad 
(Confidence in overall status: High)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.

Water body name:	Spelga Dam
Water body identification code:	UKGBNI3NB0026 <i>This is a heavily modified water body.</i>
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate ecological potential
2021 Objective:	Good ecological potential
2027 Objective:	Good ecological potential
2005 risk assessment:	1a - At risk
2009 ecological potential:	Moderate 
(Confidence in ecological potential:	Low)

Reasons for setting alternative objectives

Technically infeasible - Practical constraints of a technical nature

Practical constraints of a technical nature prevent implementation of the measure by an earlier deadline.

Water body name:	Lough Island Reavy
Water body identification code:	UKGBNI3NB0017 <i>This is a heavily modified water body.</i>
Catchment stakeholder group:	Upper Neagh Bann
Local management area:	Upper Bann
2015 Objective:	Moderate ecological potential
2021 Objective:	Good ecological potential
2027 Objective:	Good ecological potential
2005 risk assessment:	1a - At risk
2009 ecological potential:	Moderate 
(Confidence in ecological potential:	Low)

Reasons for setting alternative objectives

Technically infeasible - Cause of adverse impact unknown

The specific source of the adverse pressure or combination of pressures on this water body, causing a deterioration in status, has yet to be determined. Consequently, a solution cannot feasibly be identified and further investigation is necessary.
